

SkinPen Treatment Post Care Instructions

Immediately Following Treatment:

- Do not apply anything to the skin for 6-8 hours after treatment. This includes make-up, SPF or products of any kind.
- Avoid clothing, headbands, hats or scarves on the treated area. If clothing is to be worn over the treatment area, we recommend cotton clothing that hasn't been treated with fabric softeners or dryer sheets.
- Redness and/or swelling is common and will resolve within 1-2 days.

8 Hours After Treatment

- Cleanse skin then apply hyaluronic acid serum using the products recommended to you by your clinician. Do not apply anything else to the skin.

Days 1-6 Post Treatment

- AM Routine-Cleanse skin then apply hyaluronic acid serum using the products recommended to you by your clinician. Follow with SPF.
- PM Routine- Cleanse skin and apply hyaluronic acid serum using the products recommended to you by your clinician.
- Bruising, pinpoint bleeding, minor scabbing, minor breakouts, swelling and/or redness may occur and will resolve within 7-10 days of treatment.
- Do not pick, peel, rub, scrub or irritate your skin in any way while it is healing, as this may cause scarring.
- Avoid heat, saunas, hot tubs and sweaty activity; this includes exercise of any kind.
- Do not use an electric or manual facial brush of any kind (i.e. Clarisonic or something of the like).
- Mineral make-up may be worn, however, we recommend leaving skin clean for this time period if possible.

Days 7+

- You may resume your regular skin care routine as long as peeling/flaking has subsided. If you are still peeling/flaking, be patient and allow your skin the time it needs to heal before starting back on your routine.

FOLLOW-UP: To achieve the best results, complete the full treatment schedule at the intervals recommended by your technician.
